AGILITY DOG EXCELLENT ADVANCED TRIALS

Course Plans

2009 Revision, effective from 1 January 2010

NZKC ADX ADVANCED TRIALS ~ COURSES ~ LEGEND

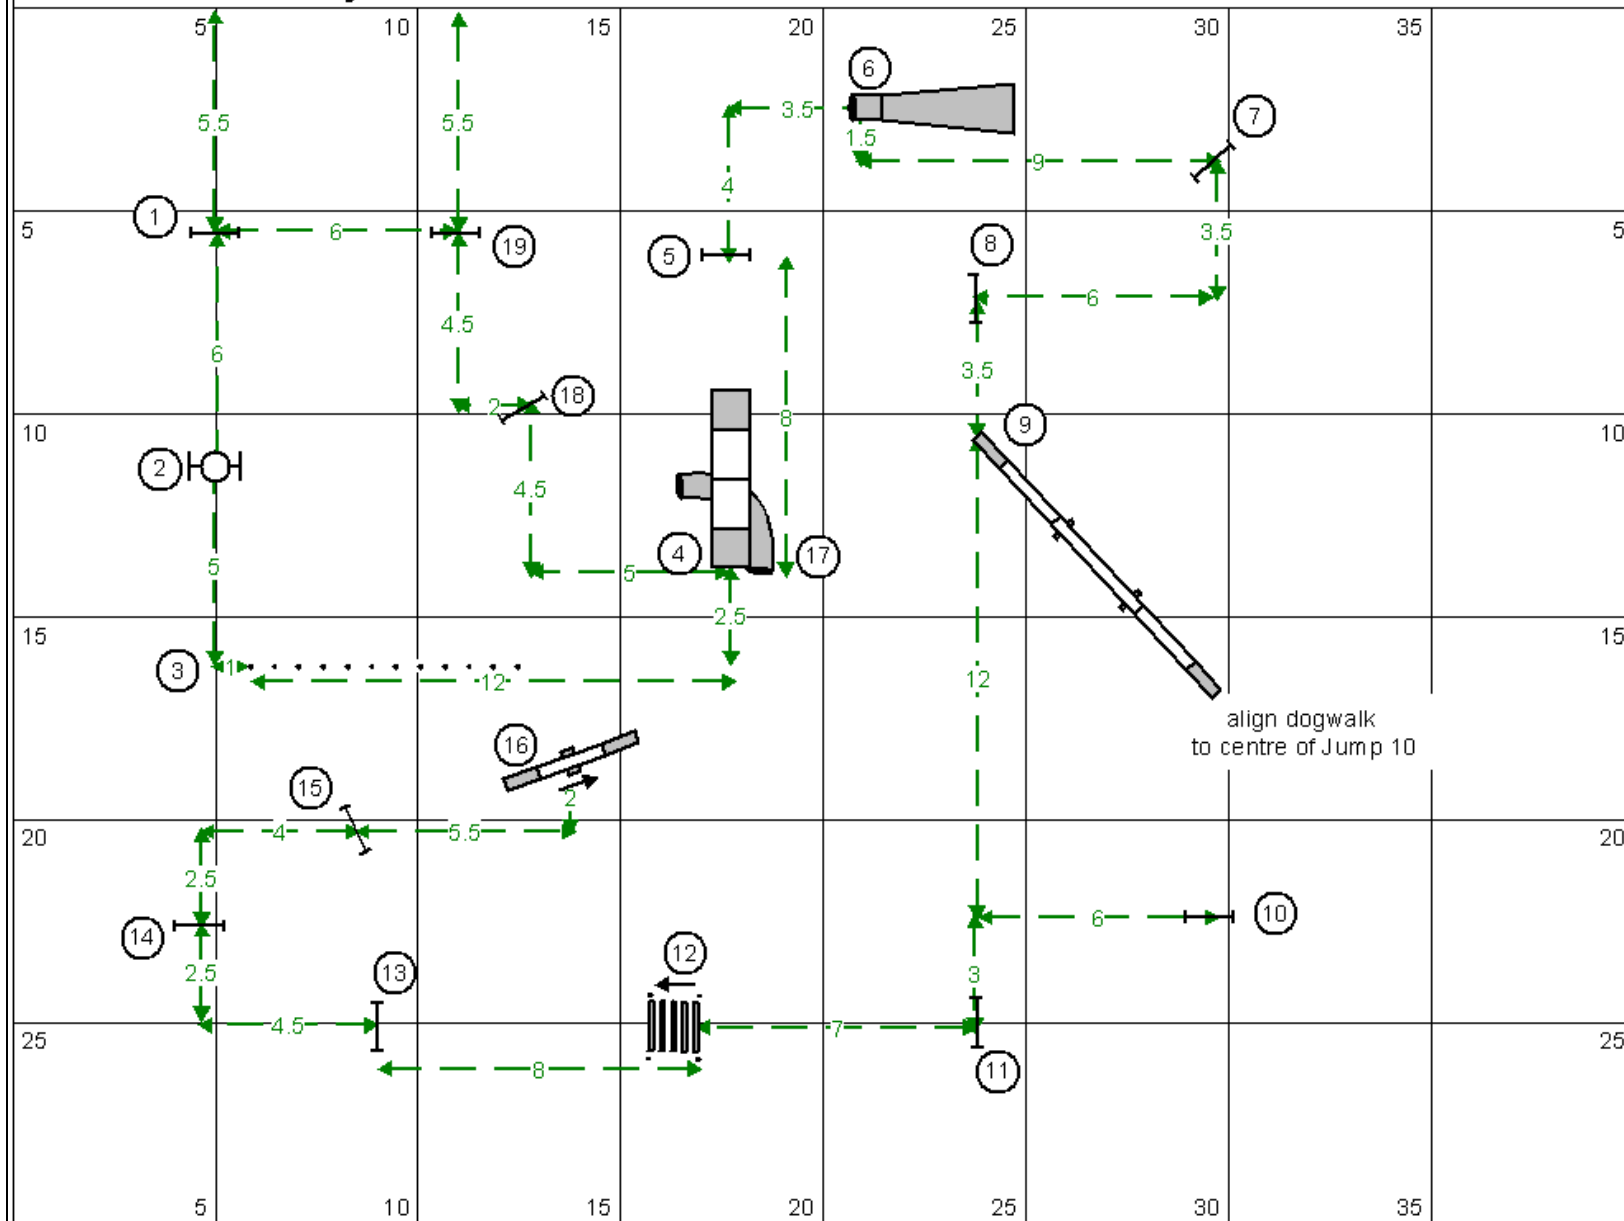

Electronic Timing should be used where possible. If hand-held timing is utilised, timing must still be taken from first and last obstacle as shown on the plan.

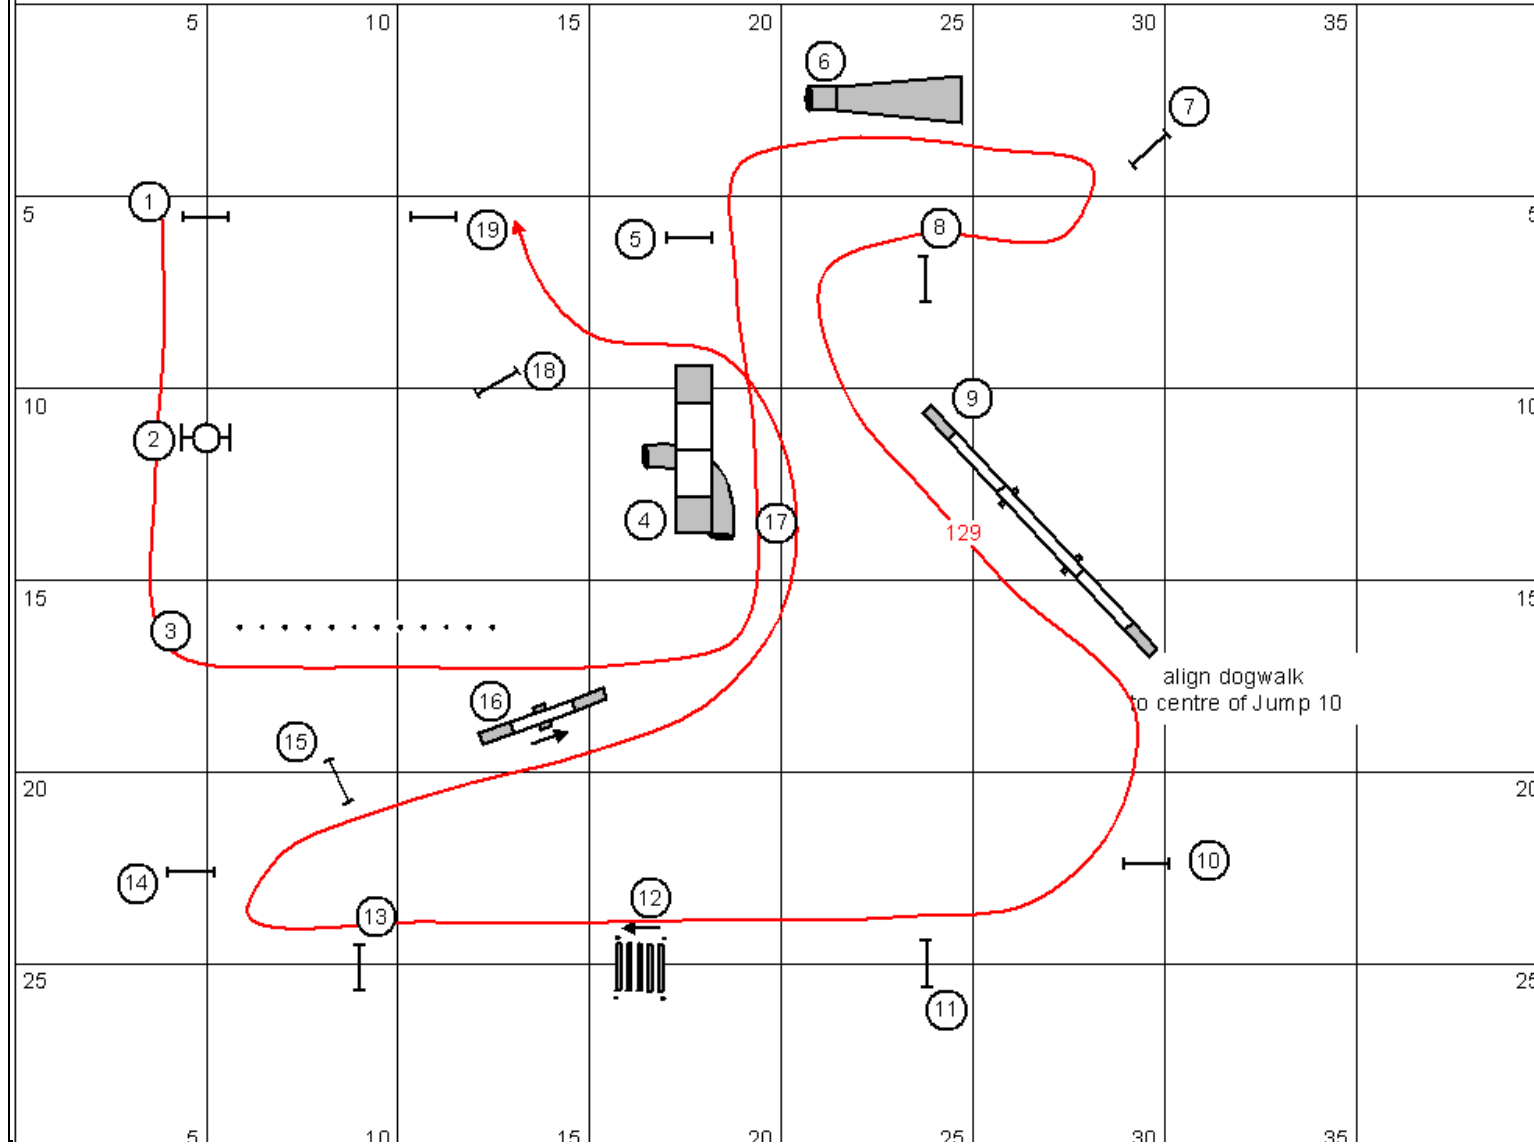

The course is to be measured for length following the path the handler would take if they were to run the course with the dog on their left hand side throughout (a guide is included for each course plan). Individual measurements should be as close as possible to that given, however a plus or minus variance of 0.25 metre is acceptable.

Courses should be randomly drawn, with a re-draw allowable if the drawn course is not suitable for the layout of the ring which will be used.
