

Jumpers A- Table for calculating Maxi/midi Qualifying Course Time (QCT)

Judge to select a rate of travel suitable for a maxi/midi dog to gain a challenge certificate. Take into consideration course complexity, weather/ground conditions. Use the selected rate of travel and the course length to determine the maxi/midi QCT.

A JUMPERS - Table for determining qualifying, standard and maximum course times

Based on the Maxi/midi (Large) qualifying course time, the QCT for unsplit classes and small dog splits, the overall standard course time (SCT) and the maximum course time (MCT) can be determined.
