

## Stabilising wings Jumps.

The following are some idea for stabilising wing jumps as well as a picture showing what will NOT be allowed.

Left & Right (Blue wing) Peg placed alongside wing.

Right: shows peg placed on BOTH sides of the wing

Below (orange wing).

Wind bags placed on both sides of wing to stabilise it.

Left/Below : single yellow sand bag placed beside wing to stabilise it.

Right: Milk bottles filled with water placed to stabilise wings.

Below: Pegs are NOT to be placed over or through any part of the wing.
